(115) Dec. 2 2022

Starting with version 9.370, EES provides a Mastering EES menu item in the Help menu. If the Mastering-EES.pdf file is placed in the same directory as the EES application, selecting the Mastering EES menu item will start Adobe Reader, open the Mastering-EES.pdf file and automatically enter the password.

TABLE OF CONTENTS

1 INTRODUCTION TO EES 1
1.1 Acquiring and Installing EES 1
Acquiring EES 1
Installing EES 2
Silent Installation 3
Online Help 3
1.2 Entering and Solving Equations 6
Entering Equations 6
The Solution Window 8
Decimal vs Comma Separator 9
The Variable Palette and Information dialog 9
Guess Values 11
Limits 11
Display Format 12
Rules for Entering Equations 14
Comments 14
Hyperlinks in the Equations Window 15
Visible Hyperlinks 15
Hidden Hyperlinks 16
Built-In Math and String Functions 17
External Functions and Procedures 17
String Variables 18
The $TabStops Directive 19
Showing Values and Setting Variable Units in the Equations Window 19
The Status Bar and Screen Background Color 19
Equations and Display Preferences 20
The Formatted Equations Window 24
Password Protection 26
Key Variables 26
1.3 Parametric Tables 28
Creating a Parametric Table 30
Alter Values 31
Solving a Parametric Table 32
Formatting Columns 35
The $If, $IfNot, $Else, and $EndIf Directives 35
Naming and Documenting Parametric Tables 36
Saving and Loading Parametric Tables 37
1.4 Basic Plotting 39
Generating a Plot 39
Modifying Axes 40
Overlaying Plots 42
Modifying Plots 43
Automatic Update 44

Error Bars *45*
The Plot Tool Bar *46*
The Cross-Hairs, Move, and Zoom Tools *49*
1.5 Units *51*
Unit System *51*
Entering Units *51*
Dual Units *53*
Units Recognized by EES *54*
Checking Units *55*
Automatically Setting Units *58*
The Convert Function *58*
The Units List *59*
Suggested Method for Working with Units *61*
The ConvertTemp Function *63*
Adding Units *63*
Using String Variables for Units *65*
EXAMPLE 1.1 Oxygen Dewar *66*
1.6 Printing *66*
Printing a Hard Copy *66*
Copying Equations *67*
LaTeX Report *68*
1.7 Arrays *70*
Assigning Array Variables *70*
Array Range Notation *71*
Two-Dimensional Arrays *71*
The Array Editor *72*
The Duplicate Statement *74*
Arrays in the Variable Information Dialog *75*
Using the Variable Information Dialog with Large Arrays *76*
Purge Unused Variables *76*
EXAMPLE 1.2 Extended Surface Problem *78*
1.8 Lookup Tables and Lookup Files *78*
Creating a Lookup Table *78*
Entering Data *78*
Using Strings in Lookup Tables *80*
Using Equations in a Lookup Table *80*
Saving and Loading Lookup Files *82*
Deleting Lookup Tables from the Lookup Table Window *82*
Lookup Table/File Commands *83*
Lookup File Formats *84*
EXAMPLE 1.3 Pump Performance Model *86*
1.9 Other Features *86*
Built-In Constants *86*
Adding Constants *87*
The Calculator Window *88*
Preferences and Syntax Highlighting *90*

References *93*

2 CURVE FITTING & INTERPOLATION **94**
2.1 Curve Fitting *94*
Curve Fitting Plotted Data *94*
EXAMPLE 2.1 Fitting Compact Heat Exchanger Data *99*
Curve Fitting Data in an Array Table with the CurveFit1DT Procedure *99*
Curve Fitting Data in a Lookup Table using the CurveFit1DT Procedure *101*
EXAMPLE 2.2 Fitting the Saturation Pressure of Water *102*
2.2 Linear Regression *103*
The Linear Regression Menu command *103*
The LinearRegression Procedure *107*
EXAMPLE 2.3 Fitting Compressor Data *107*
EXAMPLE 2.4 Fitting Compressor Data (revisited) *111*
2.3 One Dimensional Interpolation *111*
2.4 Two Dimensional Interpolation *112*
The Interpolate2D Function *113*
The Interpolate2DM Function *114*

3 FUNCTIONS AND PROCEDURES **115**
3.1 Equations and Assignment Statements *115*
The Assignment Operator *116*
3.2 Functions *116*
Format of Functions *116*
First Example of a Function *117*
Second Example of a Function *119*
Setting and Checking Units for Function Variables *119*
Variable Information Page for a Function *120*
3.3 Procedures *121*
Format of Procedures *121*
Example of a Procedure *122*
3.4 Logic Statements *124*
If-Then-Else Statements *124*
EXAMPLE 3.1 Wind Turbine *125*
Return Statements *125*
GoTo Statements and Statement Labels *127*
Repeat-Until Construct *128*
Case Statements *128*
EXAMPLE 3.2 Compressor Refrigeration Capacity *129*
3.5 Units in Functions and Procedures *131*
3.6 Arrays in Functions and Procedures *134*
Arrays as Arguments *134*
Using the $Common Directive to Access Arrays *136*
Using the $Constant Directive to Set Array Limits *136*
Arrays Table Window for Functions and Procedures *137*
EXAMPLE 3.3 Lumped Capacitance Problem *137*
3.7 Using Lookup Tables *140*
3.8 The Beep and Print Commands *141*

3.9 The Warning and Error Procedures ... *143*
The Warning Procedure ... *143*
The Error Procedure ... *145*
References ... *146*

4 PROPERTY DATA ... **147**
4.1 Unit System ... *147*
Unit System Dialog ... *147*
Specific Properties on a Molar vs Mass Basis ... *147*
The $UnitSystem Directive ... *148*
Unit Settings in the Status Bar ... *149*
Importance of Unit System Selection ... *149*
4.2 Function Information ... *149*
4.3 Property Functions for Real Fluids and Mixtures ... *150*
Calling Protocol for Property Function ... *150*
List of Property Functions ... *151*
The RealThermoProps Procedure ... *153*
Built-in Real Fluids ... *155*
Property Indicators ... *157*
Fixing the State ... *157*
Two-Phase States ... *158*
The Example Box ... *159*
EXAMPLE 4.1 Vapor Compression Cycle ... *160*
Equations of State ... *163*
Properties of Water ... *163*
The Reference State ... *165*
The $Reference Directive ... *166*
4.4 Property Functions for Ideal Gases ... *167*
The Ideal Gas Model ... *167*
List of Ideal Gas Fluids ... *168*
Ideal Gas vs Real Gas Fluids ... *168*
The IdealGasThermoProps Procedure ... *169*
EXAMPLE 4.2 Gas Turbine Engine ... *171*
The NASA Ideal Gas Database ... *174*
The FluidType$ Function ... *176*
EXAMPLE 4.3 Turbine Function ... *176*
The Ideal Gas Reference State & Chemical Reactions ... *177*
EXAMPLE 4.4 Chemical Reaction between Methane and Oxygen ... *177*
EXAMPLE 4.5 Adiabatic Combustion with Chemical Equilibrium ... *179*
4.5 Psychrometric Properties ... *184*
The Fluid AirH2O ... *184*
Properties Specific to Psychrometrics ... *184*
List of Psychrometric Properties ... *185*
List of Indicators for Psychrometric Properties ... *186*
Psychrometrics Example ... *186*
The PsychProps Procedure ... *187*
EXAMPLE 4.6 Humidification System ... *188*

4.6 Brine Properties ... *188*
Brine Property Functions ... *188*
Brine Fluid Mixtures ... *190*
Using the Brine Property Functions ... *191*
The BrineProp2 External Procedure ... *192*
4.7 The Incompressible Substance and TPSX Libraries ... *193*
Incompressible Property and TPSX Property Library Functions ... *194*
Using the Incompressible and TPSX Library Property Functions ... *196*
Solid-Liquid_Props Library File (deprecated) ... *197*
Incompressible and TPSX Property Tables ... *197*
Adding Incompressible Property Data ... *201*
4.8 More Libraries ... *205*
4.9 Property Plots ... *206*
The Property Plot Dialog ... *206*
Property Plots for Real Fluids ... *208*
Property Plots for Ideal Gases ... *211*
Psychrometric Plots ... *212*
Property Plots for Brines ... *214*
Property Plots Using the EES_REFPROP Interface ... *215*
Property Plots for Substances in the Incompressible and TPSX Libraries ... *215*
Overlaying States onto Property Plots ... *217*
4.10 NH3H2O (Ammonia-Water) ... *220*
EXAMPLE 4.7 Absorption Refrigeration Cycle ... *222*
4.11 Property Data in External Procedures ... *225*
The IdealGasMixtureProps Library Procedure ... *226*
The NASA Library ... *228*
Ammonia-Water Properties ... *230*
Sea Water Properties ... *232*
Lithium Bromide-Water and Lithium Chloride-Water Properties ... *232*
The GENEOS Library ... *234*
The Peng-Robinson Library ... *234*
The EES_REFPROP Interface ... *235*
EXAMPLE 4.8 Using EES Property Functions to Access REFPROP data ... *235*
EXAMPLE 4.9 Using the EES_REFPROP Procedure ... *244*
Metal (Solid, Liquid, Vapor) Properties ... *245*
The Rocket Propellants Library ... *246*
4.12 Adding Property Information ... *248*
Providing Data in Lookup Tables ... *249*
Providing Ideal Gas Property Data ... *249*
Providing Real Fluid Property Data represented by the Martin-Hou Equation of State ... *252*
Using REFPROP .fld Files ... *257*
References ... *259*

5 CONVERGENCE AND DEBUGGING ... 260
5.1 Solution Methodology Used in EES ... *260*
Numerical Solution of One Non-Linear Equation ... *260*
Stopping Criteria ... *263*

EXAMPLE 5.1 Setting Guess Values and Limits 264
Numerical Solution of Simultaneous Non-Linear Equations 265
Blocking and Reordering Equation Sets 269
5.2 The Residuals Window 271
Blocks 271
Residuals 272
Units 272
Calls and Time 273
Procedures in the Residuals Window 274
EXAMPLE 5.2 Blocking Equations 275
5.3 The Computational Flow Window 275
5.4 Setting Guess Values and Limits 282
The Variable Information dialog 282
Setting Guess Values and Limits using Variables 283
Arrays in the Variable Information dialog 284
Changing Variable Names 285
Variable Information Files 285
EXAMPLE 5.3 Using Arrays as Guess Values and Limits 286
Default Variable Information 289
5.5 Using the Debug Window 289
Incorrect Degrees of Freedom 289
Constrained Solution 291
5.6 Debugging Techniques 291
Effective Use of EES 292
The Update Guesses Command and Directive 292
EXAMPLE 5.4 Using the Update Guesses Command 293
The Residuals or Computational Flow Window as a Debugging Tool 296
Common Problems 298
The $Trace Directive 299
References 301

6 OPTIMIZATION 302
6.1 One-Dimensional Optimization 302
Implementing an Optimization Problem 303
Objective Function 305
Degrees of Freedom 305
The Min/Max Dialog 305
Stopping Criteria 306
Guess Value and Bounds 307
The Golden Section Search 307
The Quadratic Approximations Optimization Method 309
Min/Max Table 311
EXAMPLE 6.1 Maximum Power of a Heat Transfer-Limited Power Cycle 313
6.2 Multi-Dimensional Optimization 316
The Conjugate Directions Method 319
The Variable Metric Method 320
The Nelder-Mead Simplex Method 320

The DIRECT Algorithm *321*
The Genetic Method *322*
EXAMPLE 6.2 Non-linear Regression using Optimization *325*
6.3 Constrained Optimization *328*
Implementing Constraints using Bounds *328*
Parameterizing Variables *329*
Penalty Function *331*

7 INTEGRATION **334**
7.1 Numerical Integration of Ordinary Differential Equation *334*
Example ODE *334*
Analytical Solution *335*
Discretizing Time *336*
Euler's Technique (First Order Explicit) *336*
Heun's Method (Second Order Explicit) *340*
The Fully Implicit Method (First Order Implicit) *343*
The Crank-Nicolson Method (Second Order Implicit) *344*
7.2 Equation-Based Integral Function *345*
Calling Protocol for the Integral Command *345*
Entering the State Equations *345*
Carrying out the Integration *346*
The Integral Table *347*
Adaptive Step Size *348*
The $IntegralStop Directive *350*
Integrating Simultaneous ODEs *351*
EXAMPLE 7-1 Simultaneous ODEs *351*
The IntegralValue Function *354*
EXAMPLE 7-2 The IntegralValue Function *354*
Double Integration *358*
Multiple Integral Tables *360*
7.3 Table-Based Integral Function *362*
EXAMPLE 7.3 Use of the Table-Based Integral Function *362*
7.4 Solving Partial Differential Equations *363*
EXAMPLE 7.4 Solving Partial Differential Equations *363*

8 UNCERTAINTY PROPAGATION **369**
8.1 Uncertainty Propagation using the RSS Method *369*
The Root Sum Square Method *369*
Example of the RSS Method *370*
8.2 Uncertainty Propagation in EES *372*
Assigning Uncertainties to Measured Variables *372*
Determining the Uncertainties of Calculated Variables *374*
UncertaintyOf Function *375*
Uncer.Pardif and Uncert.Percent Functions *376*
8.3 Uncertainty Propagation in Tables *376*
Uncertainty Propagation Table *376*
Plotting Data with Uncertainties *377*
Uncertainty Propagation with Lookup Tables *378*

EXAMPLE 8-1 Uncertainty Calculations using Data in a Lookup Table *378*
8.4 Uncertainty Propagation in Integrals *382*
EXAMPLE 8-2 Uncertainty in the Calculation of Work to Compress Ammonia *382*

9 ADVANCED PLOTTING **386**
9.1 General Plot Window Options *386*
Naming and Documenting Plots *386*
Duplicating a Plot *387*
Saving a Plot to a File *387*
Copying a Plot to a Different Application *387*
Storing and Retrieving Plots *389*
Deleting Plot Windows *389*
Setting the Default Plot Appearance *390*
Plot Templates *390*
Plot Thumbnails Window *390*
9.2 Advanced Capabilities of X-Y Plots *392*
The Cross-Hairs Tool *393*
Point Labels *394*
EXAMPLE 9-1 Analysis of a Refrigeration Cycle *395*
Dual Axis Scales for Two-Dimensional Plots *398*
EXAMPLE 9-2 Plots with Dual Axes *398*
Plotting Date and DateTime Information *401*
Using Variables as Axis Limits *404*
9.3 Other Types of 2-D Plots *406*
Bar Plots *406*
Overlays on Bar Plots *409*
Bar Plots using String Values *412*
Side-by-Side Bar Plots *412*
Area Plots *414*
Polar Plots *417*
Time Sequence Plots *419*
9.4 Three-Dimensional Plots *427*
Three Column Data *428*
Contour-Lines Contour Plot *429*
Contour-Bands Plot *430*
Contour-Gradient Plot *432*
3D Surface Plots Using 3-Column Data *432*
3D Surface Plots Using 2-D Tabular Data *436*
3D Polygon/Points Plots *438*
Symbol Color Plots *440*
References *441*

10 SUBPROGRAMS and MODULES **442**
10.1 Subprograms *442*
Format of a Subprogram *442*
Solution and Residuals Windows *444*
Guess Values and Limits of Inputs and Outputs *446*
Subprograms with the Integral Command *447*

Subprograms to Determine the Limit of an Integral ... *452*
10.2 Modules ... *454*
Module Execution ... *454*
The Solution Window ... *455*
The Residuals Window ... *456*
Guess Values and Limits of Inputs and Outputs ... *457*
10.3 Should you use Subprograms or Modules? ... *457*
References ... *458*

11 INTERNAL LIBRARY FILES ... 459
11.1 Writing and Saving Library (.lib) Files ... *459*
An Example Library File Function ... *460*
Units in Library File Functions ... *460*
Testing a Library File Function ... *463*
Saving Functions as a Library File ... *463*
11.2 Loading and Using Library Files ... *464*
EES Library Routines in the Function Information Dialog ... *464*
Libraries in the Userlib (Userlib64) Folder ... *465*
Manually Loading Library Files ... *466*
11.3 Help for Library Files ... *467*
Using a Dedicated Help File ... *468*
11.4 Application Library Files ... *470*
11.5 The Textbook Menu ... *470*
11.6 The Library Manager ... *473*
References ... *474*

12 THE HEAT TRANSFER LIBRARY ... 475
12.1 Boiling and Condensation ... *475*
EXAMPLE 12.1 Steam flow in a pipe ... *479*
12.2 Compact Heat Exchangers ... *483*
Compact Heat Exchanger Data ... *483*
Organization of the Compact Heat Exchanger Library ... *484*
Non-Dimensional Functions ... *485*
Geometry Functions ... *485*
Coefficient of Heat Transfer Functions ... *486*
Pressure Drop Functions ... *486*
12.3 Steady State Conduction ... *487*
Conduction Shape Factors ... *487*
Spreading Resistances ... *489*
EXAMPLE 12.2 Spreading Resistance ... *490*
12.4 Convection ... *491*
Internal Forced Convection ... *491*
EXAMPLE 12.3 Designing a Water Heater ... *494*
External Forced Convection ... *496*
Free Convection ... *498*
Impinging Jets ... *499*
Regenerator Packings ... *500*
12.5 Fin Efficiency ... *501*

12.6 Flow Maps ... *503*
EXAMPLE 12.4 Flow Maps ... *503*
12.7 Fouling Factors ... *505*
12.8 Heat Exchangers ... *506*
Log Mean Temperature Difference Solutions ... *506*
Effectiveness-NTU Solutions ... *508*
Axial Conduction and Regenerator Models ... *510*
12.9 Radiation View Factors ... *510*
12.10 Total Hemispherical Emissivity ... *511*
12.11 Transient Conduction ... *512*
12.12 Pipe Dimensions ... *515*
12.13 Minor Losses and Flow Measurement ... *516*
References ... *518*

13 COMPLEX ALGEBRA ... **519**
13.1 Introduction to Complex Algebra in EES ... *519*
Assigning Complex Variables in Rectangular Form ... *520*
Assigning Complex Variables in Polar Form ... *521*
Units of Complex Variables ... *522*
The Variable Information dialog ... *523*
Complex Algebra ... *523*
Functions Specific to Complex Variables ... *524*
Built-In Functions and Complex Variables ... *525*
13.2 EXAMPLE 13.1 Analysis of an AC Circuit ... *525*
Parametric Table ... *527*
The $Real Directive ... *529*
Subprograms ... *530*

14 DIRECTIVES ... **531**
14.1 Directives related to Display & Formatting Options ... *531*
$Allow '//' ... *531*

15 THE DIAGRAM WINDOW ... **569**
15.1 Placing Graphic Objects in the Diagram Window ... *569*

Development and Application Modes *569*
Graphical Objects from a Drawing Program *570*
Graphical Objects Drawn in the Diagram Window *571*
Drawing and Modifying Lines and Arrows *572*
Drawing and Modifying Rectangles *574*
Drawing and Modifying Ellipses or Circles *576*
Drawing and Modifying Polylines and Polygons *577*
Accessing the Diagram Window Palette *579*
The Add Picture from File Capability *582*
15.2 Placing Text Items in the Diagram Window *583*
Entering Plain Text *583*
Entering Formatted Text *585*
EXAMPLE 15.1 Performance of an IC Engine *588*
15.3 Entering Input and Output Variables *590*
EXAMPLE 15.2 Setting up a Graphical User Interface *590*
Entering Input Numerical Variables from the Diagram Window *591*
Displaying Output Variables on the Diagram Window *592*
Limits on Input Variables *594*
Entering Input String Variables from the Diagram Window *595*
Mapping String Variables in a Drop-Down List to Equations *597*
The Find Command *599*
15.4 Copying and Resizing the Diagram Window *600*
The Copy Command in Application Mode *600*
The Copy Command in Development Mode *600*
Change Window Size Dialog *601*
Clearing the Diagram Window *601*
15.5 Adding Calculate, Print, Plot Access, and Help buttons *602*
Adding a Calculate Button *602*
Moving and Resizing the Calculate Button *602*
Calculate Button Characteristics Dialog *602*
Adding a Print Button *604*
Adding a Plot Access Button *605*
Showing a Plot on the Diagram Window *607*
EXAMPLE 15.3 Using a Macro to Create the Plot *609*
Adding a Help Button *609*
15.6 Child Diagram Windows *610*
Creating a Child Diagram Window *610*
How to Modify Child Diagram Property Information *611*
How to Access a Diagram Window from another Diagram Window *612*
15.7 Other Professional License Enhancements *613*
Group and Ungroup Selected Items Buttons *613*
Align Selected Items Button *615*
Showing a Grid on the Diagram Window *615*
Creating Links *615*
Adding an Audio-Visual Item *618*
Saving and Loading User Inputs *619*

Add Check Box Item *621*
Creating and Using Radio Button Groups *623*
Using Sliders for Inputting Values *626*
EXAMPLE 15.4 Creating a Quiz Using Equations in Diagram Input fields *628*
Entering a Filename into a String Variable *632*
EXAMPLE 15.5 Converting Units for Inputs and Outputs in the Diagram Window *632*

16 DIAGRAM WINDOW ANIMATION **638**
16.1 Controlling the Attributes of Diagram Window Objects *638*
Attributes of Rectangle and Ellipse/Circle Objects *638*
The GetAttribute function *641*
Attributes of Line Objects *642*
Attributes of Polyline and Polygon Objects *642*
Attributes of Text Objects *643*
Attributes of Diagram Window Plot Objects *644*
EXAMPLE 16.1 Selecting a Plot to Display in the Diagram Window *645*
Attributes of Button, Radio Group and Check box Objects *648*
Showing and Hiding Diagram Window Objects *648*
16.2 Setting Attributes within the Diagram Window *649*
Setting Attributes with Text Drop Down Lists *649*
Setting Attributes with a Check Box Object *653*
Setting Attributes with a Radio Button Group *654*
Controlling the Equations Window with Check Boxes and Radio Button Groups *655*
Using Attributes to Select a Picture in the Diagram Window *657*
EXAMPLE 16.2 Selecting a Heat Exchanger Core in the Diagram Window *658*
Improving the Response Time of Diagram Window Controls *660*
16.3 Exchanging Inputs and Outputs *660*
16.4 Using Parametric and Integral Tables for Animations *665*
EXAMPLE 16.3: Setting up an Animation Using the Parametric Table *666*
Saving Animation Files for the Generation of a Movie *667*
EXAMPLE 16.4: Setting up an Animation Using the Integral Table *668*

17 DISTRIBUTABLE PROGRAMS **674**
17.1 Distributable Program Setup and Startup Dialog *674*
17.2 Setting Distributable File Information *679*
17.3 Completing the Distributable File *683*

18 MACROS **685**
18.1 The EES Macro Window *685*
The Macro Window Toolbar *687*
Creating a Macro in the Macro Window *689*
EXAMPLE 18.1 Repeated Solving Using a Macro *691*
The EES Log File *693*
18.2 EES Macro Commands *695*
18.3 Interacting with External Programs using Macros *735*
EXAMPLE 18.2 Interacting with Microsoft Excel *735*
EXAMPLE 18.3 Interacting with MATLAB *738*
18.4 Using a Macro for Serial Port Communications *742*

Basic Communication with the Arduino UNO *742*
Logging Data to a Lookup Table and Plotting *744*
18.5 Executing EES Macros from External Programs *750*
Executing an EES Macro File from the Windows Run dialog *750*
Executing an EES Macro File from MATLAB *751*
Executing an EES Macro File from Excel *753*
Executing an EES Macro File from LabView *756*
18.6 Interacting with EES using Dynamic Data Exchange *760*
Dynamic Data Exchange with Excel *760*
Dynamic Data Exchange with MATLAB *762*
18.7 Alternative Ways to Run a Macro from EES *763*
The CallMacro Statement *763*
The $RunMacroAfter and $RunMacroBefore Directives *766*
18.8 Useful Macro Examples *767*
EXAMPLE 18.4 Set up a Lookup Table for a Factorial Design *767*
EXAMPLE 18.5 Select all Files of a Particular Type from a Directory *768*
EXAMPLE 18.6 Create a Property Plot and Superimpose State Data *769*
EXAMPLE 18.7 Open all .EES files in a directory and copy the equations to .docx files . *770*
EXAMPLE 18.8 Repeatedly call EES from MATLAB *771*
EXAMPLE 18.9 Use of the Input dialog with Radiation View Factors *773*
EXAMPLE 18.10 Automatically Creating 3-D Polygon Plots *776*

19 EXTERNAL FUNCTIONS AND PROCEDURES 778
19.1 EES External Functions (.dlf files) *778*
External Functions written in DELPHI Pascal *779*
External Functions written in C++ *783*
19.2 EES External Procedures - Type 1 (.dlp files) *785*
Type 1 External Procedures written in Pascal *786*
Type 2 External Procedures written in C++ *790*
19.3 EES External Procedures - Type 2 (.fdl files) *793*
Type 2 (.fdl procedure) with the MinGW Open Source GCC Fortran Compiler *797*
19.4 Multiple Files in a Single Library File (.dll or .dll64) *801*
19.5 Managing External Library Files *804*
Loading External Library Files *804*
Providing Help for External Library Files *804*
19.6 External Python Procedures *805*

20 THE COMPONENT LIBRARY 812
20.1 Overview of the Component Library *812*
20.2 Examples using the Component Library *815*
EXAMPLE 20.1 Heat Pump Design *815*
EXAMPLE 20.2 Heat Pump Simulation *819*
EXAMPLE 20.3 Analysis of a Pump and Piping System *823*
EXAMPLE 20.4 Adiabatic Combustion with Chemical Equilibrium *828*
20.3 Summary of the Component Library *831*

21 THE REPORT WINDOW 835
21.1 Creating the Report *835*

EXAMPLE 21.1 Analysys of a Refrigeration Cycle *835*
21.2 Inserting EES Variables *840*
21.3 Inserting EES Plots *841*
Appendix A: Built-In Mathematical Functions **843**
Appendix B: Built-In String Functions **853**
Appendix C: Directives **856**
Appendix D: Macro Commands **859**
Appendix E: Overriding Default Behavior **872**
Appendix F: EES File Types **875**
Appendix G: The 64-bit Professional license **880**
Appendix H: Startup Options **881**
